**My School**

The school where I studied is situated not far from my house. It's a modern building of a typical design. In front of the school there is a big sportsground, behind it there is a small garden with beautiful flower beds. Here on the sportsground pupils have their classes in physical training when the weather is fine. When you enter the school you'll see work-shops and a canteen on the left.

There is a large hall on the first floor and schoolchildren hold their meetings here. We are proud of our Physics, Chemistry, Botany and English labs. They are tape recorders, TV sets and other necessary things there. During the years of study, we have various subjects, such as Physics, Mathematics, Chemistry, Biology, Russian and foreign languages and Literature, History, Geography. I was especially good at languages. Our teacher gave us basic knowledge of these sciences, they taught us to treat nature carefully, to love our Motherland, to be honest and hardworking.

I like my school very much.

#### **Education**

Education is very important in our life. An educated person is one who knows a lot about many things. He always tries to learn, find out, discover more about the world around him. He gets knowledge at school, from books, magazines, from TV educational programs. The pupils can get deeper knowledge in different courses in different subjects and school offers these opportunities. Nowadays the students of secondary schools have opportunities to continue their education by entering, gymnasiums, lyceums, colleges. But the road to learning is not easy. To be successful in studies one must work hard. It's for you to decide to learn and make progress or not. The role of foreign languages is also increasing today. Thanks to the knowledge of foreign languages one can read books, magazines in the original, talk to foreigners, translate various technical articles. Moreover, in our country we need specialists with profound knowledge of foreign languages like English, German or French. To know foreign languages is absolute necessary for every educated person, for good specialists.
